### faq

#### What is the process for choosing our new home?

First, you choose the model that best fits your family's needs. Next you choose your new home site. Then you will sit with one of our New Home Consultants and choose our structural options, such as, fireplace, bonus room, decks, front porch, and more!

The next steps are with your lender and attorney. The builder's attorney will send contracts for you to review and sign with your attorney. Once the contracts are signed, we forward them to your lender. The builder requires a 10% deposit on contract. Then construction begins! We estimate 4-6 months depending on weather.

#### What will the taxes be on our new home?

Each home is assessed by site size and square footage. The estimated tax is around \$13,000 - \$16,000 annually.

#### What kind of upgrade options do you offer?

While we provide a base model home with many upgrades already included, we understand the importance to some buyers of putting their own personal touch into their new home. We have a list of commonly requested upgrades in your packet. Our builder will happily work with you to come up with a custom plan of upgrades if you would like something that isn't on our list.

### Can I come see the progress of our new home being built?

Yes! We want you to enjoy every aspect of all the excitement that goes into building your new home. We ask that if you are looking to walk the home that you schedule an appointment with us. Safety is very important to us and we want to make sure the home is safe for you and your family to walk through.

#### Can we have a walkout basement?

Walkout conditions are dependent on the grade of the homesite. The homesite you choose will determine if the walkout conditions can be met.

#### Can we choose our own paint colors or fixtures?

You can upgrade the paint colors, as well as provide the fixtures you want and the builder will pass along the fee for installation.

#### Is there an HOA?

There is no HOA.
